Our Sediment Quality Unit contact for RI/FS review will be Erika Shaffer-I have cc'd her on this message and her phone number is 360-902-1086. I am currently reviewing the Draft Public Health Assessment from DOH. Please forward CIP and let us know your timeline for comments-Erika and I can discuss workloads and get back to you on this.

I have not heard anything regarding removal of pontoons-last I heard permitting process was too daunting for those companies showing interest. I will see if there is an update on this status.

Glad to hear a signed agreement is near.

Hi Shayne-

I think you gave me contact info for the DNR contact we would be working with as the RI/FS work for this site gets underway. I can't seem to find it, so was wondering if you could forward this on to the person for me (or send me the appropriate contact info).

EPA has been working on the Community Involvement Plan for the Gasworks Superfund Site and are planning on sharing it with key stakeholders for review prior to making it available to the public. We were wondering if DNR would have the time and interest to take a look at it and provide us with any feedback you might have. We expect to have something that we can share in the next couple of weeks.

Please let us know if DNR would be willing to take a look and provide comments.  
Thanks.

In the way of an update....we continue to negotiate with Cascade NG re. work at the site. I think we're almost done and hope we have a signed agreement soon.  
Anything new related to the proposed removal of the ballast tanks on the shoreline?
